

The below plan illustrates the new vehicle and cyclist movements that will be implemented as part of the completed project.

VEHICLE MOVEMENT PLAN (FINAL SCHEME)

KEY

-  New one way vehicular flow
-  New contraflow cycle lane
-  Existing vehicular flow
-  No entry point

NOTE
Please see overhead for final
scheme vehicle movement plan

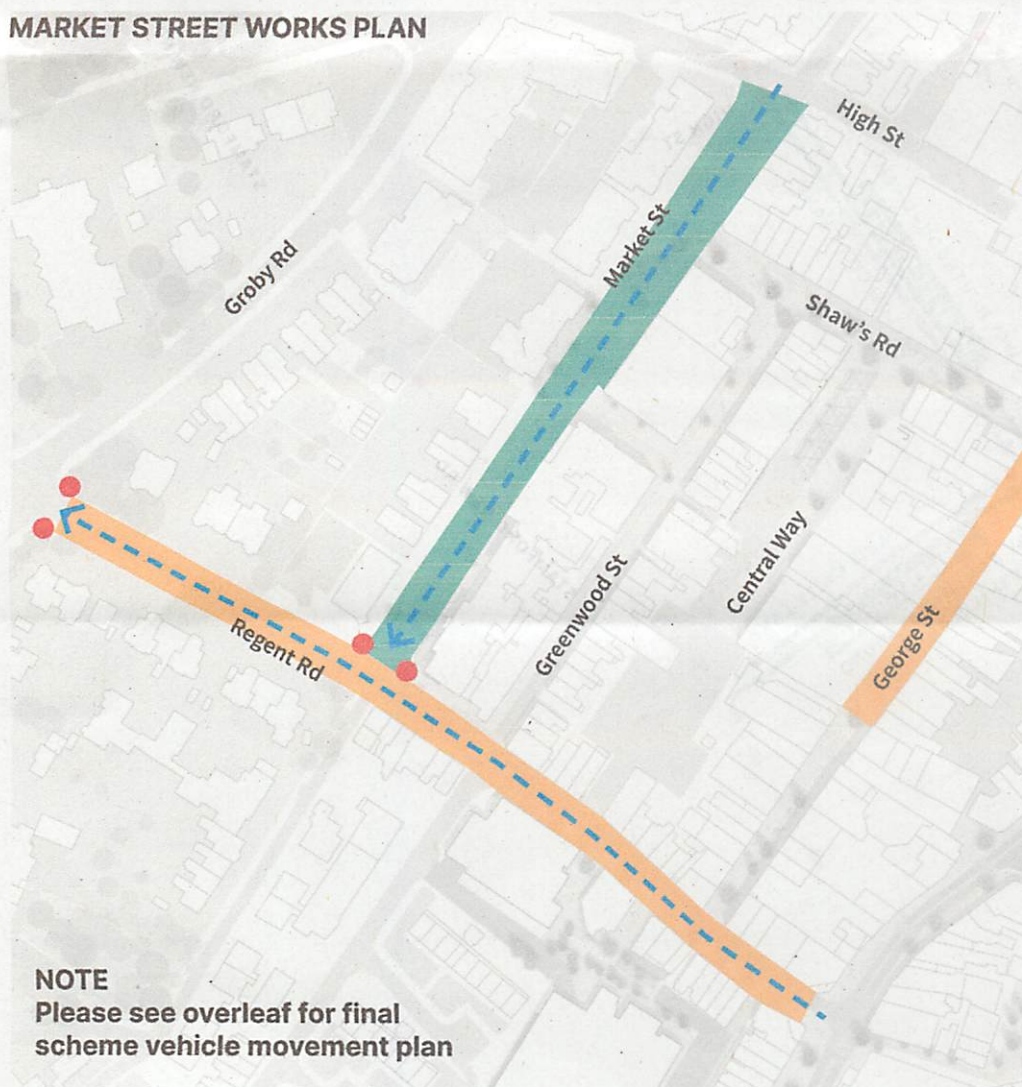

In order to complete the proposed public realm improvement works to Market Street, there will be construction works and a temporary traffic management system put in place, commencing on **9th January 2023**, until the completion of the works at the **end of May 2023**. The works area will be between the Market St / Regent Rd junction and the Market St / High St junction as indicated on the plan below. The road will remain open to vehicles, one way direction as existing. At a later stage during the Construction Phase, the one way vehicle direction will be reversed; an update will be provided nearer the time to provide further information about this change. The works and traffic management systems to Regent Rd and George St that have already commenced will continue alongside the Market Street works.

The purpose of this flyer is to provide residents, tenants, landlords and businesses with further information about the programme of works; what to expect during the works and who to contact should you have any questions or queries during the life of the project.

The Principal Contractor, Alined Construction Ltd, are responsible for all site based elements of the project, including coordination of access to buildings, maintaining traffic flows and safety of the general public. The Principal Contractor's Business Liason Officer can be contacted during the site operating hours to answer any queries or address any concerns you may have.

Pedestrian access will be maintained across the site, although will be restricted in some areas in order to provide a safe working environment for operatives and members of the public. Vehicular access to the site will be affected throughout the works. Construction traffic will access the project working areas from various locations including: Regent Rd, Cross St, Market St and Railway St / Stamford New Rd. Banksmen will be provided to ensure construction traffic and pedestrians are safely segregated at all times.

MARKET STREET WORKS PLAN

SITE CONTACTS

**Business Liason Officer
& Project Site Supervisor**
(Alined Construction Ltd)
Contact: Daniel Lyle
Mobile: 07957 059 374.
